«The list of conversation contents»

Q1. The speaker's self-introduction

Q2. The country where head office is located

Q3. The background of the alliance

Q4. The QR code payment project

Q5. The advantages of QR code payment

Q6. The schedule of the project

Q7. The project goal

2. About Ajani Sika Abdel Awar

Ajani Sika Abdel Awar, the nephew of former President of the Republic of Benin Yayi Boni, is an entrepreneur who aims to be a politician but also manages a trading company, “Space Wonder”, as its CEO.

While managing the trading company “Space Wonder”, he also launched the Benin state-operated project “QR Code Payment Project” aiming for a world where cryptocurrency and QR code payment are commonplace in the country, is working towards the success of the project.

The President of the Republic of Benin is a hereditary system, so he is expected to be the next president who is the nephew of the former President of the Republic of Benin Yayi Boni, and the success of the Benin state-operated project “QR code payment project” will definitely be a major step towards for politicians.

3. About the QR code payment project

(1) Overview

Republic of Benin state-operated project "QR Code Payment Project" is a project to spread QR code payment using cryptocurrencies in the Republic of Benin to realize convenient and secure payment.

(2) What is the mechanism to eradicate "fake products"?

- **#1 transparency**

Anyone can view the transaction record by registering the transaction record of the product on the blockchain. Unlike a centralized system where there is an administrator, third parties who have no interests can view the history, so it is highly transparent and data cannot be tampered with.

- **#2 Tracking possibility**

All transaction records for products on the blockchain are connected. In other words, it is obvious that the product was shipped from a manufacturer and arrived at the user via a retail store.

- **#3 Fiber type microchip**

Fiber-type microchips that do not interfere with design are incorporated into products during manufacturing. By reading the microchip, you can view the history on the blockchain that cannot be tampered with, such as product information, product transaction history, and logistics routes.

In this way, by using blockchain technology and microchips, anyone can view the transaction history of products that can never be tampered with, and “fake products” cannot be sold and will not be sold at all” Shopping mall platform can be built.

"cryptomall" is a "social contribution-type, cryptocurrency-dedicated shopping mall that handles over 1 million items. Utilizing the blockchain technology, we are constructing a shopping mall platform where fake products cannot be sold and will not be sold at all.
