---

## (2) What is the mechanism to eradicate “fake products”?

- **#1 transparency**

Anyone can view the transaction record by registering the transaction record of the product on the blockchain. Unlike a centralized system where there is an administrator, third parties who have no interests can view the history, so it is highly transparent and data cannot be tampered with.

- **#2 Tracking possibility**

All transaction records for products on the blockchain are connected. In other words, it is obvious that the product was shipped from a manufacturer and arrived at the user via a retail store.

- **#3 Fiber type microchip**

Fiber-type microchips that do not interfere with design are incorporated into products during manufacturing. By reading the microchip, you can view the history on the blockchain that cannot be tampered with, such as product information, product transaction history, and logistics routes.

In this way, by using blockchain technology and microchips, anyone can view the transaction history of products that can never be tampered with, and “fake products” cannot be sold and will not be sold at all” Shopping mall platform can be built.

"cryptomall" is a "social contribution-type, cryptocurrency-dedicated shopping mall that handles over 1 million items. Utilizing the blockchain technology, we are constructing a shopping mall platform where fake products cannot be sold and will not be sold at all.
