1. About sales of high-performance medical masks

（1） Overview

On Tuesday, April 28, 2020, cryptomall ou, the operator of "cryptomall", a special shopping center for "social contribution" password assets (virtual currency), began to sell high-performance medical masks that can be delivered in real time at a price equivalent to the original price (88 yen per piece, including freight). We received 10,000 masks additionally on Thursday, April 30, in response to the planned number of 10,000 sold out on the same day.

In addition, in order to deliver to many people, one item is limited to one person (50 sheets x 2 boxes = 100 sheets). Please note that once purchased, it can be purchased again only after 3 business days have passed.

# （2） Background to the start of sales of medical masks

Currently, due to the epidemic of the new coronavirus infection (COVID-19), we are facing a serious shortage of masks in various situations.
Also, due to the soaring prices of raw materials for masks, we have been forced to sell masks that are more expensive than usual, making it difficult to overlook that poor masks are distributed at low prices.

In order to overcome this situation, "cryptomall" will sell reliable medical masks at almost the cost (88 yen per piece * shipping included). Cryptomall will do its utmost to bring back a society where everyone can purchase reliable masks with peace of mind.

#2 Mining business that takes advantage of the land in Estonia

"cryptomall mining" is a business that performs crypto asset (virtual currency) mining such as "Bitcoin (BTC)".In particular, we practice mining with emphasis on fundamental metals such as "half-life" as appropriate so that income and capital gains with high profitability can be easily obtained.

 In addition, "cryptomall mining" is the world's first system that sells heat generated by mining to electric power companies, and has been successfully installed.

 In addition, cryptomall ou, who is well-versed in the cryptocurrency and blockchain industries, has developed a highly profitable and unique mining business by utilizing the know-how cultivated over many years, the climate of the Republic of Estonia, and other regional characteristics.

#3 cryptographic asset (virtual currency) exchange business to make all businesses work organically

"cryptomall exchange" is the only cryptocurrency exchange that can be converted to Euro.

At the exchange, it is possible to trade crypto assets (cryptocurrency) issued by "cryptomall" such as "cryptomall token (XMALL)" and "cryptomall stable token (SMALL)" at low cost.

Furthermore, various benefits such as mining rewards can be obtained by owning "cryptomall Token (XMALL)".

We will provide services that satisfy users through the synergy between businesses operated by cryptomall ou.

（2） What is the mechanism to eradicate Fake /Pakuri products?

・ **Point 1 Transparency**

By registering transaction records of products on the blockchain, anyone can view transaction records.Unlike a centralized system with an administrator, third parties with no stake in the system can view the history, making it highly transparent and unable to alter data.

・ **Point 2 Possibility of tracking**

All transaction records of products on the blockchain are connected.In other words, it's clear at a glance that it was shipped from one manufacturer, passed through a retail store, and reached the user.

・ **Point 3 Fiber type microchip**

A fiber microchip that does not interfere with the design is incorporated into the product during manufacturing.By reading the microchip, you can browse the information on the blockchain that cannot be altered, such as product information, product transaction history, and logistics routes.

In this way, by using blockchain technology and microchips, anyone can browse the transaction history of products that can never be tampered with, and "Nisemono / Pakuri products" will not be sold at allYou can build a shopping mall platform.
